

R is Ready for Business™

Revolution R Enterprise Adds Production-Grade Capabilities to R

Revolution R Enterprise is production-grade analytics software built upon the powerful open source R statistics language. With commercial enhancements and professional support for real-world use, it brings higher performance, greater scalability, and stronger reliability to R – at a fraction of the cost of legacy products.

Revolution R Enterprise is 100% R & More™.

It includes all of R's advanced data analysis and graphics capabilities, **PLUS**:

- **Performance Enhancements:** Revolution R Enterprise is significantly faster than open source R for common real-world computations.
- **Greater Productivity & Ease-of-Use:** Visual development tools help R programmers write and debug R code faster.
- **Tackle 'Big Data':** Perform advanced analytics on terabyte-class data sets, without restrictive memory barriers or expensive equipment.
- **IT-Friendly Enterprise Deployment:** Integrate R code into your secure enterprise applications with a scalable Web Services framework.
- **On-Call Expert Technical Advice:** Revolution R Enterprise is backed by our team of veteran statisticians, support engineers and a global professional services network.

Revolution Analytics is the leading commercial provider of software & support for the popular open source R statistics language.

R is Ready for Business™

With Revolution Analytics Professional Services

On-Call Technical Support

Revolution Analytics offers installation assistance and production-level support for our Enterprise subscribers –

giving you a direct response for your specific question or issues.

If your business requires fast resolution and reliable advice, our expert team is made up of experienced statisticians and support engineers, who will help you with the R language and advanced Revolution R Enterprise features.

For extended support, on-call Consulting credits can be purchased that will put the expertise of Revolution Analytics Professional Services' statisticians and solution architects at your disposal.

Consulting

Revolution Analytics can help you develop and deploy successful analytics solutions based on Revolution R best-practices – through our in-house team of experts and by partnering with respected professional services organizations worldwide. Past client projects have included:

- Performance optimizations
- Statistical algorithms & large-scale data models
- Package validation, development and support
- Database integration
- Vertical industry & regulatory requirements
- Sponsored features

Training

Revolution Analytics also partners with leading experts in R and analytics to offer professional training courses, designed to give your organization a firm foundation in R programming and building high-performance applications that leverage R. Experienced instructors will customize these courses to meet your specific needs, schedule and budget – using data and examples relevant to your industry or research field.

Contact Revolution Analytics to learn how its Professional Services team can help ensure your next analytics project is a success.
