

R is Ready for Business™

Revolution R Enterprise Brings High-Performance & Productivity to R

Need more Speed?

Benchmarks show Revolution R Enterprise is significantly faster than open source R for many real-world computations. Linked with high-performance multi-threaded math libraries, Revolution R Enterprise automatically reduces computation times when using multi-core and multi-processor hardware.

Take immediate advantage of:

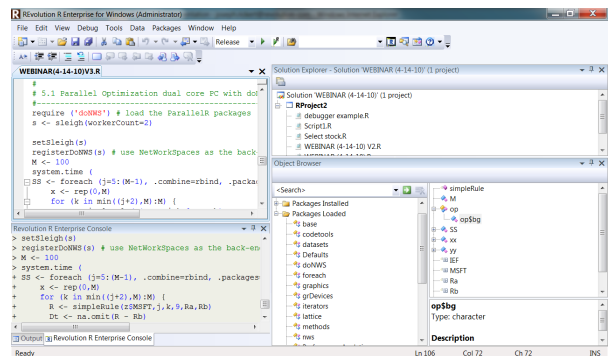

- Significant speed enhancements over open source R.
- 64-Bit Scalability: Analyze larger data sets on 64-bit Windows and Linux systems.
- Parallel Processing Power: Reduce computation time for simulations, optimizations, segmented data analysis and more.

Visual IDE for R (Windows only)

Revolution R Enterprise features a visual development environment that enables faster, more accurate R programming for developers—leaving the command-line far behind!

The Revolution R Productivity Environment features:

- Experience a modern development environment for the R language with a syntax-aware Script Editor with highlighting, indentation, and more.
- Improve R programming proficiency with hover-over help, word completion and customizable “code snippets” to automate common R programming tasks.
- Streamline interactions with the R language with a fully-featured command-line editor and object browser.
- Create quality R code, faster with a full-featured visual debugger with one-click breakpoints and step-processing.
- Manage complex development projects with a Solution Explorer to organize data files, scripts and outputs. Save, load and switch projects with ease.
- Help Teams Collaborate and Control Changes with open source Subversion version control software.
